

Dear :

This letter, which has been signed by three mental health organizations representing over one thousand mental health professionals, was sent to President Trump in strong opposition to his cruel and illegal policy of imprisoning migrant children. We thought it crucial for representatives to be aware of this letter and we are asking of you three things:

1. To oppose any policy that further defies the Flores Agreement.
2. To hold President Trump and this administration accountable for the traumatization of children and acknowledge that this is a crime against humanity as identified by the International Criminal Court.
3. To explicitly state your disagreement with this administration's treatment of migrant children and families.

If you are interested in speaking directly with any of us, please contact [dr.DanaSinopoli@gmail.com](mailto:dr.DanaSinopoli@gmail.com).

Sincerely,

National Coalition of Concerned Mental Health Experts

Psychologists for Social Responsibility
